Allowable Subject Matter

1. Claims 1-21 are allowed.

The prior art of record, including Umemoto et al. (US Patent No.: 6,768,529 B2), does not show or suggest the applicant's invention as claimed. Specifically, the prior art of record does not disclose a flat liquid crystal display (LCD) comprising:

- A light source module providing light beams such that the first image is displayed on the first side and a second image is displayed on the second side of the flat LCD; and the light source module including first and second light sources disposed on respective first and second sides of LCD as recited in the independent Claim 1.

The above-indicated combination, including an LCD positioned between a pair of light guides each optically coupled to a light source, and the assembly producing images on both sides of the LCD, makes this invention unique.

Umemoto et al. ('529 B2) discloses an LCD device including an LCD positioned between a pair of light guides each optically coupled to a light source. However, Umemoto et al. ('529 B2) additionally includes an optically path-changing sheet, which improves frontal directivity of the light beams. The provision of the path-changing sheet does not allow image display on both sides of the LCD. Therefore, Umemoto et al. ('529 B2) does not meet the limitation of the independent Claim 1.

Thus, Claim 1 is allowed over prior art.

Claims 2-21 necessarily allowed because of their dependency on the allowed base Claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lee et al. (U.S. Patent No. 6,480,248 B1), Hirose (Japanese Patent No.: JP 2001-290445) and Goto (Japanese Patent No.: JP 10-9067)
